

Hello, I am ST.

In 1999 I started my professional career and have been working in different constellations, countries and industries. I began my work as a freelancer in 2005, at that time still part-time. Since 2013 I work as an Agile Coach and Scrum Master for national and international transformation projects. Since 2018 I have also been teaching agile methods as well as Design Thinking & Business Model Innovation as a university lecturer. I also worked in digital product management, organizational development and executive coaching in the fashion & lifestyle segment, as an agile coach, scrum master and data protection officer for the German branch of a Swiss company for individual agile open source software development. Prior to that I worked as a project engineer, head of the Competence Center and head of IT Service, and as a research assistant at the Fraunhofer Institute for Solar Energy Technology. I also worked as a technical project manager for an EU art and theatre project. My first job was as a maintenance technician in a power plant.

I grew up and went to school in Cottbus, in the southeast of Germany. There I started my apprenticeship as an energy electronics technician for industrial engineering (EEBE) in 1995. Since 2001 I studied computer science with minor subject physics in Isny im Allgäu and graduated as Diplom Informatiker. Since 2010 I am certified data protection officer (DSB-TÜV). On a part-time basis, in 2013, I completed a general management degree at Steinbeis, School of International Business and Entrepreneurship with studies abroad at SDA Bocconi in Milan, Italy and Tsinghua University in Beijing, China and graduated with a Master of Business Administration (MBA). Immediately afterwards I studied fine arts in Stuttgart, specializing in painting, drawing and printing. At the end of 2019 I completed my training as a full-stack web developer at the Hamburg Coding School.

I have over 25 years of experience in local and international companies, with different cultures in different working locations such as Switzerland, England, Greece, Norway, China, South Korea, USA and Germany in the automotive, utilities, retail, financial services, research & development, IT, legal & compliance, engineering, arts, culture & theater industries.
